

C: Main exercises.

1. For each of sections 1.1, 1.2, and 1.3 of the book, compare and contrast the material in that section with the content of our project “Deduction through the Ages: History of Truth”. Your comparison should be detailed and should include explanation addressing the following:
 - Does the material in the book correspond to material in the project?
 - Is there material in the book that is not in the project?
 - Is the material in the book presented in the project in a different way? How? In what ways do you believe one is better than the other, and why?
 - Compare the notation and symbols used between the book and the project.
