- BE BRIEF AND TO THE POINT IN YOUR ANSWERS.

NAME: _________________________
Question 1

1. Describe precisely what an array is (list the specific features that characterize an array).

2. In the following expression, identify precisely in what order the different operations are performed and provide the final value of the expression:

\[ 2 \times 3 \% 6 \div 2 + (x = y = 3) \times 2 \]
Question 2

Define the concept of \textit{call by value}. Illustrate it with an example.
