Preface  xi

Chapter 0
INTRODUCTION

Methods for Semantics Specification  3
Suggested Readings   4

Chapter 1
SYNTAX

1.1 Abstract Syntax Definitions  10
1.2 Mathematical and Structural Induction  14
Suggested Readings   17
Exercises   17

Chapter 2
SETS, FUNCTIONS, AND DOMAINS

2.1 Sets  20
   2.1.1 Constructions on Sets  22
2.2 Functions  23
   2.2.1 Representing Functions as Sets  25
   2.2.2 Representing Functions as Equations  27
### 2.3 Semantic Domains

#### 2.3.1 Semantic Algebras

**Suggested Readings**

**Exercises**

### Chapter 3

**DOMAIN THEORY I: SEMANTIC ALGEBRAS**

#### 3.1 Primitive Domains

#### 3.2 Compound Domains

- 3.2.1 Product
- 3.2.2 Disjoint Union
- 3.2.3 Function Space
- 3.2.4 Lifted Domains and Strictness

#### 3.3 Recursive Function Definitions

#### 3.4 Recursive Domain Definitions

#### 3.5 Summary

**Suggested Readings**

**Exercises**

### Chapter 4

**BASIC STRUCTURE OF DENOTATIONAL DEFINITIONS**

#### 4.1 The Valuation Function

#### 4.2 Format of a Denotational Definition

#### 4.3 A Calculator Language

**Suggested Readings**

**Exercises**

### Chapter 5

**IMPERATIVE LANGUAGES**

#### 5.1 A Language with Assignment

- 5.1.1 Programs are Functions

#### 5.2 An Interactive File Editor

- 5.2.1 Interactive Input and Partial Syntax

#### 5.3 A Dynamically Typed Language with Input and Output

#### 5.4 Altering the Properties of Stores

- 5.4.1 Delayed Evaluation
- 5.4.2 Retaining Multiple Stores
- 5.4.3 Noncommunicating Commands

**Suggested Readings**

**Exercises**
Chapter 6
DOMAIN THEORY II: RECURSIVELY DEFINED FUNCTIONS

6.1 Some Recursively Defined Functions 104
6.2 Partial Orderings 108
6.3 Continuous Functions 112
6.4 Least Fixed Points 113
6.5 Domains are Cpos 114
6.6 Examples 120
   6.6.1 Factorial Function 120
   6.6.2 Copyout Function 121
   6.6.3 Double Recursion 122
   6.6.4 Simultaneous Definitions 122
   6.6.5 The While-Loop 123
   6.6.6 Soundness of Hoare’s Logic 126
6.7 Reasoning about Least Fixed Points 128
Suggested Readings 131
Exercises 131

Chapter 7
LANGUAGES WITH CONTEXTS

7.1 A Block-Structured Language 139
   7.1.1 Stack-Managed Storage 146
   7.1.2 The Meanings of Identifiers 148
7.2 An Applicative Language 150
   7.2.1 Scoping Rules 152
   7.2.2 Self-Application 155
   7.2.3 Recursive Declarations 157
7.3 Compound Data Structures 161
Suggested Readings 167
Exercises 167

Chapter 8
ABSTRACTION, CORRESPONDENCE, AND QUALIFICATION

8.1 Abstraction 174
   8.1.1 Recursive Bindings 178
8.2 Parameterization 179
8.2.1 Polymorphism and Typing 181
8.3 Correspondence 185
8.4 Qualification 186
### Chapter 9
**CONTROL AS A SEMANTIC DOMAIN**

- Continuations 196
  - Other Levels of Continuations 199
- Exception Mechanisms 200
- Backtracking Mechanisms 202
- Coroutine Mechanisms 204
- Unrestricted Branching Mechanisms 204
- The Relationship between Direct and Continuation Semantics 210

### Suggested Readings
- 213

### Exercises
- 213

### Chapter 10
**IMPLEMENTATION OF DENOTATIONAL DEFINITIONS**

- A General Method of Implementation 217
  - The SIS and SPS Systems 218
- Static Semantics Processing 220
- The Structure of the Evaluator 221
  - A Stack-Based Evaluator 223
  - PSP and Appel’s System 227
- Combinator-Based Semantic Notations 229
  - The Plumb and CERES Systems 230
- Transformations on the Semantic Definition 231
  - First-Order Data Objects 232
  - Global Variables 234
  - Control Structures 237
- Implementation of Continuation-Based Definitions 239
  - The CGP and VDM Methods 243
- Correctness of Implementation and Full Abstraction 244

### Suggested Readings
- 247

### Exercises
- 247

### Chapter 11
**DOMAIN THEORY III: RECURSIVE DOMAIN SPECIFICATIONS**

- Reflexive Domains Have Infinite Elements 252
11.2 The Inverse Limit Construction 257
11.3 Applications 265
   11.3.1 Linear Lists 265
   11.3.2 Self-Applicative Procedures 267
   11.3.3 Recursive Record Structures 268

Suggested Readings 269
Exercises 269

Chapter 12
NONDETERMINISM AND CONCURRENCY

12.1 Powerdomains 275
12.2 The Guarded Command Language 276
12.3 Concurrency and Resumption Semantics 279
12.4 An Alternative Semantics for Concurrency 283
12.5 The Powerdomain Structure 291
   12.5.1 Discrete Powerdomains 291
   12.5.2 General Powerdomains 294

Suggested Readings 300
Exercises 300

Bibliography 304
Index 325
